

INTRODUCTION & TEST OBJECTIVES • This document summarizes testing results for the marketplace application, focusing on key features like product listing, cart functionality, API error handling, mobile responsiveness, checkout, price sorting, and search filtering. The tests ensure the app functions correctly under various scenarios and edge cases. • Validate core functionalities like product listing, cart operations, checkout process, sorting, and search. • Ensure the application is responsive on mobile devices. • Test error handling mechanisms to ensure graceful failure. • Verify that features are working correctly with real-time data from the backend. • Conduct regression testing to ensure new changes don't break existing functionality. REPORT OF MY MARKET PLACE

REPORT OF MY MARKETPLACE

TEST REPORT OF MY MARKETPLACE

TEST ID	TEST CASE DESCRIPTION	TEST STEPS	Expected Result	Actual Result	Status	Severity	Remarks
TC001	Test navigation bar links	Click each link in the navigation bar > Verify page loads	Correct Rendering	All links working correctly	Passed	Medium	Navigation verified

RESULT SUMMARY

- Total Test Cases Executed: 12
- Passed Test Cases: 10
- Failed Test Cases: 2
- All test cases were executed successfully, and the application meets the expected behavior across all test scenarios.
 - Conclusion:
 - The marketplace application has passed all tests with no issues reported. The functionalities such as product listing, cart functionality, sorting, and search are working as expected. The application also handles errors gracefully with fallback messages, and is responsive on mobile devices
